

## THE TRAINING PROGRAMME DESIGNED TO REDUCE RISK TO YOUR BUSINESS. THAT'S VANONOMICS.

Tired of paying out for collision damage and dealing with incidents in your fleet? Want to educate your drivers about safe driving practice?

Northgate's new Driver Risk Management service offers expert online courses to both drivers and fleet managers about how to reduce the risks of being out and about on the road.

Choose from a range of courses designed to keep your drivers up to date with the latest training standards, including electric and hybrid vehicles and vehicle safety courses.

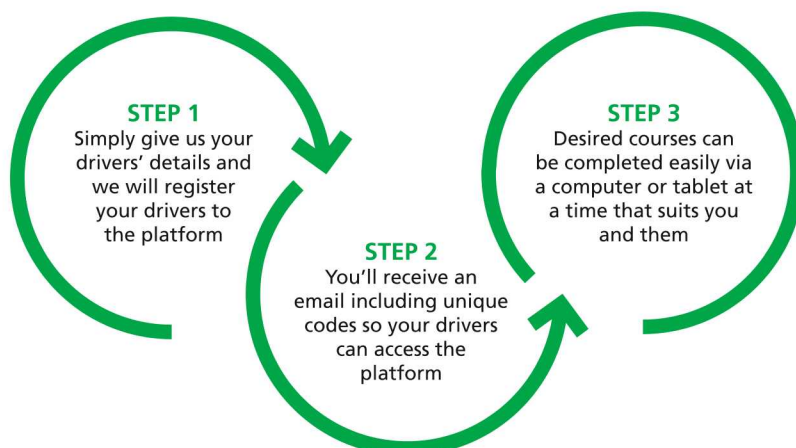

Our Risk Management product consists of the following:

- A **4-stage driver risk assessment** covering driver attitude, knowledge, concentration and observation and hazard perception.
- A range of interactive **e-Learning modules**, designed to improve your drivers' knowledge and driving skills.
- **Reporting suite** and dashboard to ensure you have visibility of your overall drivers' risk profile.

### Key features and benefits

- ✓ Gain full visibility of the risk areas across all your drivers.
- ✓ Educate your drivers on how to reduce fuel consumption and minimise the risk of collisions; thereby saving you money.
- ✓ Can be used to assess a driver's knowledge as part of the recruitment process, thereby helping to make sure you only employ good drivers.
- ✓ 'Market leading' online training courses with the ability to tailor training to meet your individual needs.

### How it works

## DRIVER ASSESSMENTS AND E-LEARNING MODULES

Following completion of an online risk assessment, your drivers are given an overall risk rating of High, Medium or Low risk as well as a breakdown for each individual section. This allows fleet managers to understand where individual driver's strengths and weaknesses lie and where to support in development and education. There is an extensive range of e-Learning modules, below are some of the most popular.

The infographic features a central white box with a red-to-green gradient bar representing risk levels: HIGH (red), MEDIUM (orange), and LOW (green). Below the bar, it states: "Drivers complete the online risk assessment and results are sent to fleet managers with a risk rating of high to low. Based on the assessment outcome, drivers can complete e-learning modules to improve their knowledge within a specific area." Surrounding this central box are 12 icons, each with a corresponding label for an e-learning module: Avoiding rear end collisions (truck icon), Speed awareness (speedometer icon), Mobile phones and other distractions (phone icon), Motorway and dual carriageway discipline (road icon), Driving in cities and rural areas (steering wheel icon), Parking and manoeuvring (P sign icon), Adverse weather (cloud with rain and snow icon), Attitude and behaviour (two faces icon), Hazard perception (warning triangle icon), Eco driving (leaf icon), Cyclist awareness (bicycle icon), and Vehicle safety checks (wrench icon).
